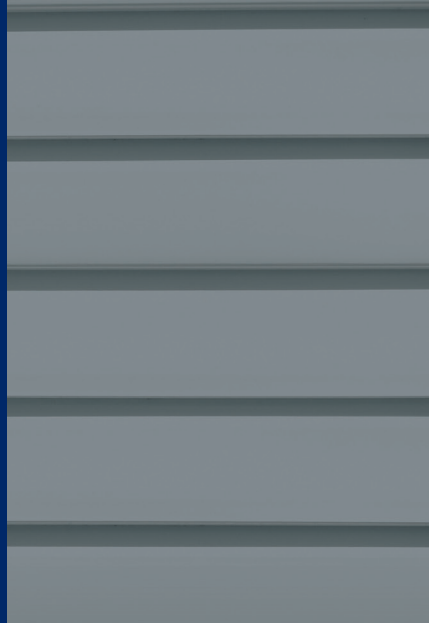
VINYL SIDING AND ARCHITECTURAL PLASTICS

Dulux Paints

SIDING**SAFE**™ COLOURS ARE AVAILABLE IN

DULUX® DIAMOND™ EXTERIOR AND DULUX® WEATHERGUARD®

EXTERIOR PAINT



SIDING**SAFE**™

SidingSafe Colour Technology enables you to choose from 30 curated colours for vinyl siding, architectural plastic and composite building materials.

Historically, vinyl siding could only be painted the same colour or lighter as the siding would warp or buckle when painted a colour darker than the original siding. This was because traditional darker colours caused the siding to warp when exposed to sun and heat.

The solution is *SidingSafe* Colour Technology, a method the PPG Colour Laboratories created of developing colour formulas specifically for these substrates, eliminating the worry of warping or buckling. Use *SidingSafe* colours on your next exterior project to add a splash of colour with confidence.

Choose from our *SidingSafe* palette of 30 versatile paint colours, selected for their beauty and broad suitability to most any architectural style.

DULUX® DIAMOND™ EXTERIOR

A 100% acrylic, high-build latex paint, *Dulux Diamond* Exterior paint is specially formulated with outstanding technologies to withstand the ever-changing Canadian weather. This paint provides advanced UV protection and dirt resistance to keep exterior colours looking like new for years to come. Formulated with an effective fungicide to resist deterioration by mould, fungus/mildew, it has excellent flow and levelling properties and resists cracking and peeling. Advanced acrylic polymer technology stops the penetration of dirt and water while still allowing the coating to breathe.

- A durable surface with outstanding dirt resistance, without compromising flexibility.
- High film build allows for single coat application equal to or better than two coats.
- Easy flow modifiers offer excellent flow and levelling, with no brush or drag marks.
- Get more done in a day and extend the painting season with low temperature application.
- Specially formulated to resist mildew.
- UV absorbers prevent paint and colour breakdown from the sun.

DULUX® WEATHERGUARD®

A premium quality 100% acrylic latex exterior paint, *Dulux WeatherGuard* is designed for use on most exterior surfaces, specially formulated to provide excellent weather resistance, easy application and a quick curing time for a long-lasting, water-resistant uniform finish that protects surfaces against the extremes of the Canadian climate. Forming a breathable film that allows moisture vapour to pass through, it prevents the penetration of liquid water with a high resistance to blistering and peeling.

- 100% acrylic paint forming a breathable film that resists blistering and peeling caused by moisture.
- Excellent adhesion to a wide variety of exterior substrates.
- One coat coverage when applied over previously painted surfaces that are similar in colour.
- Excellent gloss and colour retention, resists fading and maintains a long lasting, uniform finish.
- Low temperature application extends the painting season.

CHOOSE A COLOUR PERSONALITY

INVITING, GENTLE

To achieve a warm, welcoming look, choose rich yellows, beiges, browns and creams – all colours that are softer and more muted. Pair with equally rich, muted colours for an even flow.

Body: Summer Suede **Trim:** Off White **Accent:** Sarsaparilla

CLASSIC, STATELY

For a classic, stately look, choose cool greys, off-whites, and beiges with hints of grey in them. Mix these with a clean white and pure black for a noble, classic personality.

Body: Gray Stone **Trim:** Cotton Tail **Accent:** Starless Sky

SERENE, COASTAL

For a serene coastal look, choose blues and greens that are smoky and not as saturated. Combine with greyed off whites and deep neutral darks for a look reminiscent of rivers and lakes.

Body: After The Storm **Trim:** Quest **Accent:** Industrial Revolution

WARM, JOYFUL

For a happy, friendly house, choose brighter yellows and russet colours. Mix with creams and muted darks for a warm, but brighter palette.

Body: Peppered Pecan **Trim:** Moth Gray **Accent:** Warm Mahogany

OFF WHITE DLX1024-1

TOASTED ALMOND PPG1097-3

MOTH GRAY DLX1024-4

SUMMER SUEDE DLX14-14

Body (Horizontal Siding): Craftsman Gold
Body (Vertical Siding): Toasted Almond
Trim: Off White **Accent:** Sarsaparilla

THERE'S NO BETTER FEELING THAN

FINDING THE PERFECT PAINT COLOUR

An exterior palette consists of three main colours: body, trim and accents (fascia, shutters, doors). Body or siding colour should be the dominant colour and influence the choice of the others. Start by choosing a colour personality with one of the colours on the inside of this card and remember these helpful tips.

Look to the permanent exterior elements before choosing the colour palette. Colours do not have to match existing stone, brick, roof, and landscaping, rather coordinate the paint colours with the permanent ones to unify and complement.

Garage door colours should blend with the home and integrate into the overall structure. Avoid bright and contrasting colours.

Front doors do not have to be the same colour as the shutters. Consider a different, complementary colour to create even more appeal.

TIPS ON CHOOSING THE RIGHT COLOURS

An exterior palette consists of three main colours: body, trim and accents (fascia, shutters, doors). Body or siding colour should be the dominant colour and influence the choice of the others. Start by choosing a colour personality with one of the colours on the inside of this card and remember these helpful tips.

- Look to the permanent exterior elements before choosing the colour palette. Colours do not have to match existing stone, brick, roof, and landscaping, rather coordinate the paint colours with the permanent ones to unify and complement.
- Garage door colours should blend with the home and integrate into the overall structure. Avoid bright and contrasting colours.
- Front doors do not have to be the same colour as the shutters. Consider a different, complementary colour to create even more appeal.
